Peel-Harvey Catchment Council

Clean Up Peel Waterways Workshop

Help stop the litter entering our waterways through Citizen Science

We invite you to a **FREE** Citizen Science Workshop facilitated by Alison Dorn from Tangaroa Blue. Tangaroa Blue Foundation is focused on the health of our marine environment, and coordinates the Australian Marine Debris Initiative.

There will be two workshops conducted on the 22nd of February.

Friday 22nd February

Workshop 1

TIME: 9am to 11am

WHERE: PHCC Shed,
58 Sutton Street, Mandurah

Workshop 2

TIME: 1:30pm to 3:30pm

WHERE: Lesser Hall,
1915 Pinjarra Road, Pinjarra

RSVP: sharon.meredith@peel-harvey.org.au and specify which workshop you would like to attend

This is a great workshop for anyone interested in helping reduce the impacts of litter within our community. In the workshop Alison will discuss the steps of how to conduct a Litter Audit and the process of uploading the data to Tangaroa Blue's Marine Debris Database. This data is vital in understanding the level of contamination of specific sites by litter. From this a plan can be created to identify the main offending items of litter and eliminate them from entering our waterways.
