Peel Harvey Catchment Coucil - Hotham-Williams River Action Plan Figure 2 - Popanyinning site concept

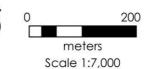

Old road bridge to remain on downgraded road may provide improved pedestrian access to the eastern riverbank and opportunities to create a loop trail.

The sides of this existing private river crossing should be

stabilised and a culvert added to reduce the frequency of overtopping and minimise erosion and sediment mobilisation from the track surface (see note 6).

Bank stability

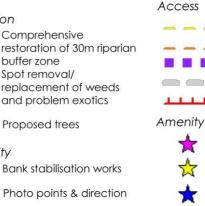

Legend

Revegetation

- 1 Revegetation comprehensive weed removal and revegetation of minimum 10m riparian buffer in these areas (30m preferred where tenure and land-use allow).
- 2 Revegetation spot removal of weeds and problem exotics, replacement with native species where necessary.
- 3 Improvements to existing private crossing including bank stabilisation and culvert modification as necessary to reduce overtopping & erosion.
- 4 Signage at key entry points to conservation areas including river restoration information and wayfinding.
- 5 Signage to provide information and connectoin to heritage trail.
- 6 Improvements to existing private crossing including bank stabilisation and culvert to reduce overtopping &erosion.
- 7 Revegetation comprehensive weed removal and revegetation of tributary.
- 8 Investigate and remove rubbish from river channel and banks - general clean-up as required.
- 9 Improvements to local drainage outlet to slow flow and prevent local erosion, including channel vegetation to stabilise and treat flows.

10 Trees for increased canopy and amenity.
