

Since 2017 **Grazing Matcher™** has been assisting southern WA livestock producers improving productivity and efficiency. Over 200 participants have completed the program

Presentations/discussions and hands-on:

Evidence based Grazing Management **tailored to southern WA**. This heavily subsidised program has been assisting livestock producers fine tune their grazing systems

- Principles to optimise pasture utilisation and resilience independent of operation size.
- Implement principles to fit your system
- Efficient hay and silage production/purchase (quality, quantity and cost), storage and allocation
- Understand seasonal stock requirement fluctuations
- Feed test interpretation and efficient feed allocation
- Monitoring stock condition to meet production targets
- Farm business performance indicators.
- ...and more!

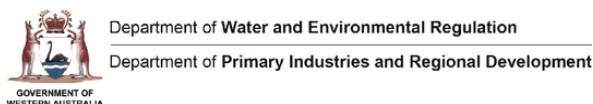

Next program, commencing **May 2025**, groups in the various areas (pending minimal numbers). **Other areas may be considered.**

How it works:

- Eight to ten businesses per group,
- Up to two people per business,
- **Eight 1/2-day on-farm meetings over 12 months**,
- Sessions facilitated by WA advisors: Jeisane Accioly (ALIS), Dan Parnell (Agsure) and Martin Staines (Leuca Creek),
- Peer networking and professional advice to support your business, both at and between meetings.

Cost per business: \$700 - tax deductible (up to \$5275 additional cost per business covered by sponsorship/in-kind)

For more info and to submit your EOI to join a group, contact Jeisane Accioly on jeisane.alis@gmail.com or on 0403327216

This program is supported by Healthy Estuaries WA - a State Government Program, The Australian Government's Climate-Smart Agriculture Program and Profitable Grazing Systems- a MLA initiative.
