

Different ways to make compost

Join us for a free, hands on workshop where we will build a Static Aeration Compost System and a Johnson-Su Compost Bioreactor

Did you know 40-60% of waste currently sent to landfill in Australia is organic waste that could be composted?

Dive into the art of sustainable living and say goodbye to food waste and hello to a thriving garden ecosystem.

This free workshop will equip you with the skills and knowledge to reduce waste, nourish your plants, and create a greener, more sustainable future. You will learn:

- How to test the pH of the compost
- What makes plants healthy
- Tools you can use to determine plant health
- The soil food web communities that contribute to plant health

When: Sunday 19 October
Time: 9.00am - 2.00pm
Where: The Natural Circle
2169 South West Highway
Jarrahdale
